

Continental Math League

Fall-2010

The 3rd and 4th grade Continental Math League teams have started! The children who have continued in the program from last year have jumped right back in without skipping a beat, and those who are new to the groups are learning quickly from their peers. There are six students on each team. The 4th grade team will have 6 meets this year, (Nov., Dec., Jan., Feb., March., April) and the 3rd grade team will have 3. (Jan., Feb., March)

We will also have a team at the second grade level. This team is still being formed. Hopefully this group will be meeting by the end of October. The second grade team will compete in three meets during the year as well.

GOOD LUCK TO OUR 3 TEAMS!!!!
